Applied Creative Digital Media (Digital Games) – *Activity 2*

Retro Gaming

Experience retro gaming: you can do this by visiting an event or arcade and play video games on original gaming systems from the 1980s – 2000s. If you cannot access any of these events in person, you can also play retro games online.

Try to play some of these classic games: Digdug, Zaxxon, Manic Miner, Pacman, Space Invaders, Tron and Donkey Kong.

You will be developing 8-bit video games on the course. From your retro gaming experience, design a game concept of your own that have been influenced by the games you have played.
