

A Level Environmental Science – *Activity 2*

The Neighbourhood Challenge

How diverse is the habitat in your local area? We are asking you to take part in a challenge to find and identify a variety of different plants and animals in your local area.

Search the app store or Google play store for the *Seek by iNaturalist* app (it's free)

Venture outside into nature and use the app to complete the Neighbourhood challenge dated Jan 2024. All challenges can be found under the challenges link in the app menu. This activity will allow comparison between different areas and highlight the diversity in your area. Think about the variety of habitats you will need to locate to find examples of each species. In addition, if you go on holiday, use the app to identify any interesting species you come across.

To complete the Neighbourhood challenge you must find and identify:

- 5 different plants
- 2 different insects
- 1 arachnid
- 2 different bird species
