A Level Mathematics – *Activity 3*

This is the final task ahead of the summer break. Watch the two short YouTube videos to inform you about possible University course combinations, and careers open to maths and science graduates. You may want to continue your own research into the many different careers, universities and course options available. Students who have a clear 'vision', of how to reach their end goal, (which career, apprenticeship, university course and grades required), tend to achieve better grades, as they are determined and focused on achieving their goal.
