

## A Level Photography – *Activity 3*

### Shoots

Over the summer we would like to you produce a photoshoot based you prior knowledge of composition. This is something that we introduce in the first week of the course, so to show us an understanding would be ideal.

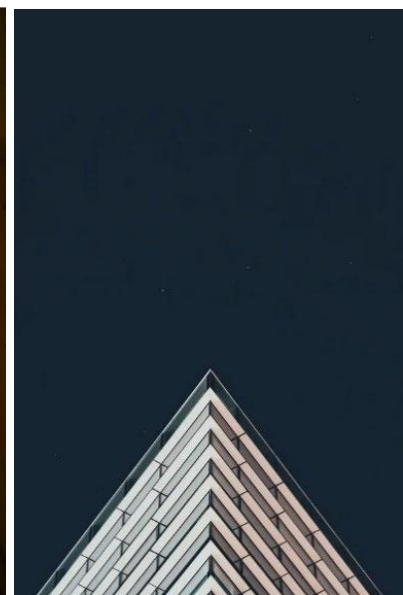

What do you know about Symmetry/Dynamic lines/Negative space? How could you capture this in an image?

Symmetry

Dynamic lines

Negative space

- Capture at least 6 different techniques in a variety of ways. (25 – 30 images in total)
- Add your contact sheet to a PowerPoint
- Select what you consider to be the best 5

Extension – Write a short paragraph around your knowledge of composition. What do you think it is, how it is used in photography. Apply this knowledge to the 5 images you selected and analyse them.
